

June 24, 2020

Dear Valued Montran Customers:

Montran continues to operate under its Business Continuity Protocol, while conforming to guidelines of international and local government authorities. Our Global Business Continuity Committee continues to adapt and improve our approach to maintaining operations, and to ensure our business resilience, on a weekly basis.

Customer maintenance and support, ongoing development and installations, project management, and professional consulting services have been continuing successfully. We have been able to deliver complete services remotely and have supported several customers' going live with our systems and upgrades during the past month.

All Montran personnel continue working remotely without issue and remain ready and able to support our customers. Our Special Task Force continues to provide additional assistance to our Customers through the Montran support teams.

We are monitoring the gradual easing of restrictions by local governments, wherever they occur, and we are beginning to draft plans for returning to the office.

At this time, we have extended our previously implemented travel restrictions until the month of August, 2020. Our Business Continuity Committee and the Montran Board of Directors shall continue to appraise the situation regularly, in light of ongoing developments, and update this policy as appropriate.

All of us at Montran remain entirely committed to meeting the needs of our Customers around the world while protecting the health and safety of everyone.

As the situation develops, we will continue to provide updates to our Customers.

We wish all of you well.

Montran Corporation Board of Directors

Alexander Esca, Chairman
